Custom software, integrations and managed IT for growing businesses.

Your tech team, without the big-company price.

VALUE
SOFTWARE SOLUTIONS

Owners know when something is slowing the business down. What they don't always know is why. We find the real cause first, then fix it with one U.S.-based team that sticks around.

WHERE TO START

Start with a free Snapshot. Pick the one that fits your week.

"The Wi-Fi drops and nobody knows why."

Network & IT Snapshot

We review your WiFi, cameras, phones and security, and flag the weak spots before they cost you.

"We run on email and spreadsheets."

Workflow Snapshot

Find the manual work costing you time or leads, and what can be automated or connected.

"Everyone says we should use AI. Where do we start?"

AI Snapshot

Where AI can save real hours, and whether your systems are ready for it. Practical, no hype.

Each Snapshot is a free 30-minute session with founder Kevin Liu (on-site for IT), plus a one-page summary of what we found and what to do next.

HOW WE WORK

Understand. Define. Build. Support.

You talk to the person doing the work. Kevin leads every engagement personally, quotes before work starts, and recommends the right fix even when it isn't us.

WHAT WE DELIVER

Software & Mobile Apps

Secure web apps, internal tools and iOS/Android apps that replace spreadsheets and manual work.

Integrations & AI

Connect your ERP, CRM, accounting and retailer EDI so data moves on its own, plus practical AI tools.

Managed IT & SEO

Networks, WiFi, cameras and VoIP on a flat monthly rate, and technical SEO so customers find you.

U.S.-Based Team	Most Clients 1+ Years	Insured: GL, E&O & Cyber	Los Angeles, CA
